

LIFE SIDE RESIDENTIAL TRAINING COURSE ON THE EU EMISSIONS TRADING SYSTEM

Course Director: **Simone Borghesi** | FSR Climate, European University Institute

Sala Europa

Villa Schifanoia, Via Boccaccio 121 - Florence

7-8 MARCH 2018

■ INTRODUCTION

This training course aims to provide European policy makers with a comprehensive analysis of the functioning and regulation of the EU ETS and of its interaction with other European policies.

The programme of the course is structured into eight lectures: four of them focus on the topic areas covered in the LIFE SIDE report “A literature-based assessment of the EU ETS”, which is a central deliverable of the project. The four areas are: Free allowance allocation, competitiveness effects and carbon leakage, Interactions with other policies, Low-carbon innovation and investment and The international dimension. Four more lectures will complement the course, providing a thorough presentation of the EU climate policy and of the EU ETS post-2020, and dealing with the key topics of “The role of bank and other financial actors” and of “Price drivers, market power and behavior”. Each lecture will include interactive sessions to enable participants to actively engage with the instructors and grasp the content of the course in an effective way.
